

MOU between Local 3943 and GLA leadership

This constitutes an agreement between Management at the Greater Los Angeles Medical Center and AFGE local 3943 on representational duties of the exclusive representative for professional bargaining unit employees.

This memorandum of understanding (MOU) is to remind managers of their labor management responsibilities and obligations when dealing with labor representatives. It's imperative that all levels of management follow the provisions outlined in the master agreement between the Department of Veterans Affairs and the American Federation of Government Employees, local supplemental agreements, and memorandums of understanding.

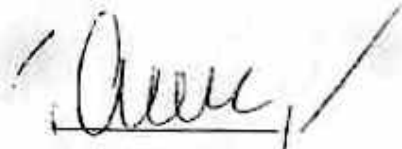

In accordance with 5 U.S.C. 7116 it is an unfair labor practice to interfere or intimidate a union official from exercising their representational duties. This includes but is not limited to, asking questions or requesting information regarding internal union business, or representational assignments.
